COP31: Can negotiators finally deliver results? | The Hindu explains

Wed 11 Nov · Governance & Social Justice, Environment & Ecology · GS2, GS3

• From catastrophic floods in Nepal to record-breaking heat, droughts and wildfires, the climate crisis is no longer a future threat.
• As world leaders gather in Antalya for COP31, the focus has shifted from promises to implementation.

Why it matters for India and UPSC

• **Environment:** India's NDCs (45% cut in emission intensity of GDP from 2005 levels by 2030, 50% non-fossil power capacity, net zero by 2070) and the principle of CBDR-RC.
• **International relations:** India speaks for the Global South on climate finance and technology transfer; carbon border taxes like the EU's CBAM affect Indian exports.
• **Internal security:** Open border can be misused for trafficking, fake currency and movement of criminals; SSB guards it.
• **Economy:** Hydropower trade (India buys Nepali power), cross-border rail and petroleum pipelines.

Static connect: UNFCCC & Paris Agreement

• UNFCCC adopted at the 1992 Rio Earth Summit; the Conference of Parties (COP) meets yearly.
• Paris Agreement (COP21, 2015): keep warming well below 2°C, pursue 1.5°C; countries submit NDCs.
• India's targets include net zero by 2070.

Govt. prohibits export of unsorted lithium-ion battery waste, scrap

Wed 11 Nov · Geography, Polity & Constitution · GS1, GS2, GS3

• The Government of India has prohibited the export of unsorted lithium-ion battery waste and scrap.
• Earlier classified under the 'Free' category, the move aims to retain critical battery material within the country for recycling.

Why it matters for India and UPSC

Securing lithium and other critical minerals is central to India's electric mobility and energy storage targets amid heavy reliance on imports.
• **Economy:** Incentivizes indigenous recycling capacities and protects supply chains from global supply shocks.
• **Environment:** Fosters a circular economy by diverting toxic e-waste into secondary raw material extraction.
• **International relations:** Reduces external vulnerabilities to foreign monopolies controlling the processing and refining of battery raw materials.

Static connect: Critical Minerals Policy in India

• The Ministry of Mines identified 30 critical minerals essential for economic development and national security.
• Battery Waste Management Rules, 2022 mandate Extended Producer Responsibility (EPR) targets for recovery and recycling of battery materials.

Prelims pointers

• Export policy notifications for commodities are issued by the Directorate General of Foreign Trade (DGFT) under the Ministry of Commerce and Industry.
• Lithium is designated as a critical and strategic mineral under the Mines and Minerals (Development and Regulation) Amendment Act, 2023.

Mains angle

Discuss the significance of retaining critical mineral waste in bolstering India's domestic battery recycling ecosystem and energy transition (GS Paper III - Economic Development & Industrial Policy).

Practice question

Examine the strategic and ecological necessity of developing a domestic circular economy for critical minerals. In this context, assess the impact of recent restrictions on the export of battery scrap.
